The Ambient HipVac 50 Wand provides fast, efficient, and precise ablation and resection of soft tissue. The Wand was developed to meet the special demands of hip arthroscopy. As part of the Ambient ArthroWand Collection, the HipVac 50 allows the surgeon to effectively monitor current temperature measurements of the arthroscopic irrigating fluid throughout the duration of the procedure.

HipVac 50 Features

- Shaft length optimized for hip arthroscopy
- Rigid shaft resists deformation at capsule resection margins, extending effective reach
- 50° angle facilitates access to hip anatomy
- Slim tip design fits through 8.0mm cannula
- Rasp electrode design provides tactile feel and efficient soft tissue ablation
- Ambient thermocouple technology provides temperature feedback of the circulating fluid with accuracy $\pm 3^{\circ} \text{C}$

Suggested Indications

- Acetabular Labrum Debridement
- Capsular Resection
- Ligament Debridement
- Soft Tissue Debridement
- Synovectomy
- Chondroplasty

Technical Specifications

ArthroWand:	Ambient HipVac 50
Catalog Number:	ASHA4730-01
Controller:	Quantum™ 2 System ONLY
Cable:	Integrated Cable Wand (ICW)
Tip Diameter Size (max):	4.7mm
Shaft Size:	4.7mm
Angle:	50°
Recommended Controller Settings:	7-9
Intended Use:	Ablation, Resection, Coagulation
Temperature Range:	20°C - 60°C
Temperature Accuracy:	$\pm 3^{\circ} \text{C}$

CAUTION: Federal (USA) law restricts this device to sale by or on the order of a physician.
